

BRIGAID

BRIDGING THE GAP FOR INNOVATIONS
IN DISASTER RESILIENCE

WE SUPPORT CLIMATE INNOVATORS

OPEN CALL FOR INNOVATIONS:

Get involved in the 2017/18 BRIGAID test cycle

BRIGAIID IS A 4-YEAR PROJECT UNDER EU HORIZON2020.

(2016-2020)

We aim to effectively bridge the gap between innovators and end-users in resilience to floods, droughts and extreme weather.

OPEN CALL FOR INNOVATIONS:

How to get involved in the 2017/18 BRIGAIID test cycle

Submit the description of your innovative solution before October 1st 2017 at climate-innovation@brigaid.eu.

BRIGAIID will select up to 9 innovations and provide funding and support for testing in 2018.

Minimum requirements for innovations:

- reduces risks from Floods, Droughts or Extreme weather
- prototype TRL4 or higher
- structural, software or eco-system based product
- eager to improve and bring it to the market

Shortly describe your innovation and ambitions for testing and improvement.

We will contact all innovators for further info and next steps.

BRIGAIID OFFERS

State of the art knowledge of climate risk, science-based methods and funding opportunities to improve innovations by:

- ① Performing tests, evaluating results and making improvements.
- ② Incorporating needs of clients in the design and business model.
- ③ Putting innovations in the spotlight.

BRIGAIID'S APPROACH

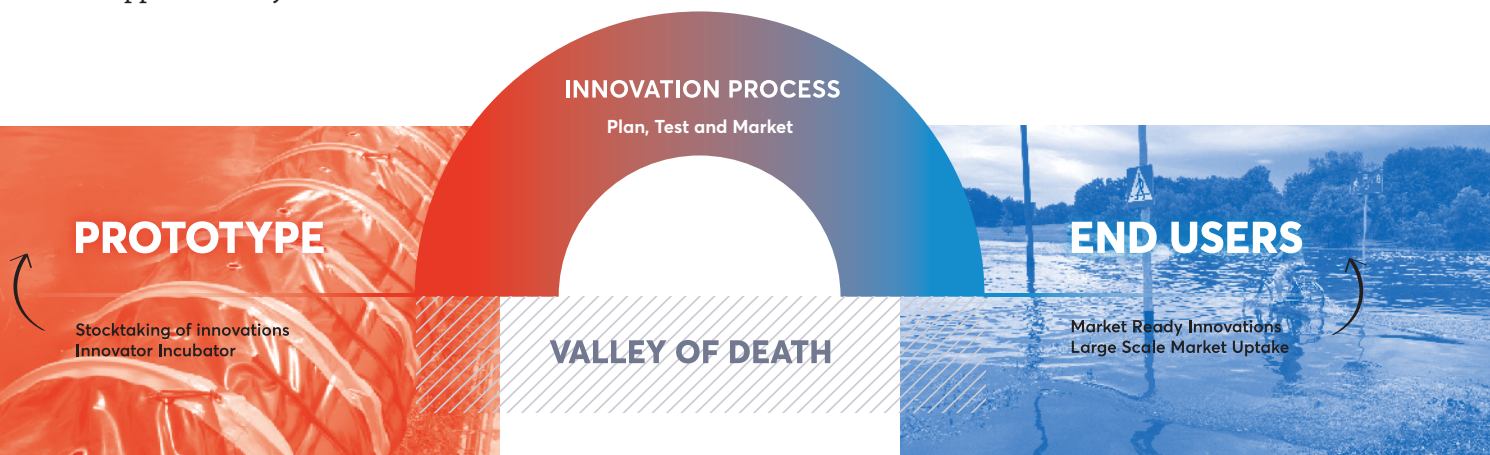

BRIGAIID clears the path to deliver innovations on floods, droughts and extreme weather to the market through the assessment and improvement of:

Technical + Social + Market Readiness

By advancing these three factors simultaneously, BRIGAIID smoothens the development path, because technical, social and market requirements can be incorporated in the design, business model and market approach early on.

BRIGAIID identifies, selects, tests and improves innovations in subsequent innovation cycles, from prototype to market-ready product.

Throughout the three innovation cycles, the 75-100 promising innovations on floods, droughts and extreme weather are assessed, of these, the 35-50 most promising ones are improved, from which the top 20-30 innovations with the highest socio-technical and investment readiness are supported to access the market.
